

WEBSPY – LATEST VERSIONS OF INTERNET AND E-MAIL MONITORING RANGE

National Business Bulletin - September 2003, Pg 63

ASX-listed WebSpy has just released new versions of its entire range of software – including its Analyzer Standard (internet monitoring), Analyzer Premium (internet and email monitoring) and WebSpy Live (real-time internet and email monitoring), products making reporting and analysis 10 times faster and data management more efficient.

WebSpy has also released the full version of its FlowMonitor solution, the first window-based tool to monitor Cisco's NetFlow traffic.
