

## WebSpy Vantage Ultimate 2.1

This document contains important information regarding the installation of the WebSpy Vantage Ultimate 2.1 and the Web Module. Please read it carefully before proceeding with the installation.

## Upgrading (Existing Vantage Users)

Vantage Ultimate will install as a separate application and can function alongside your existing Vantage installation.

Save any customized report templates, aliases and profiles using the Save link on each screen. Then open the respective files in Vantage Ultimate and Merge or Overwrite when prompted (Note, new aliases, profiles and templates have been created in Vantage Ultimate 2.1 so overwriting with your 2.0 aliases or profiles is not recommended).

You can also select **Tools | Migrate Settings** to move across any files from your old installation into the new installation's locations, or simply point the new installation to the existing paths.

If you were trailing the Vantage Giga Web Module Solution (BETA), you will need to uninstall the WebSpy Vantage Web Module before running the WebSpyVantageWebModuleSetup.exe. Reports and settings will not be uninstalled. You can therefore retain all existing reports and settings by installing the new Web Module to the same virtual server location and using the same data location (default is C:\VantageWebData).

## Documentation

This zip file contains the file 'WebSpy\_Vantage\_Web\_Module\_Administrators\_Guide.pdf'. This document is an essential resource for assisting with the setup and deployment of WebSpy Vantage Ultimate and the Web Module.

You will need Adobe Acrobat Reader to view the documentation. If you do not have Acrobat Reader, you can download it from <http://www.adobe.com/>.

## Installs

This zip file contains two setup (exe) files:

### WebSpy Vantage Web Module 2.1 Setup.exe

This installs the Web Module (Web server) component of the solution. Please ensure your Web Server(s) meets the following:

#### Minimum requirements:

- Windows Server 2003 (with 'Application Server' role with ASP.NET enabled), or
- Windows XP (with IIS Windows Component), or
- Windows Vista (With IIS Windows Component with ASP.NET and IIS6 Management Compatibility installed), or
- Windows Server 2008 (with Application Server and Web Server roles, with ASP.NET and IIS6 Management Compatibility installed).
- Microsoft .NET Framework 2.0
- 2 GHz CPU or faster
- 2GB RAM or more

#### Recommended requirements

- 64 bit Windows operating system

## Upgrading to Vantage Ultimate

### **WebSpy Vantage Ultimate 2.1 Setup.exe**

This installs WebSpy Vantage Ultimate. Please ensure the machine running WebSpy Vantage Ultimate meets the following:

#### **Minimum requirements:**

- Microsoft® Windows® 2000, XP, Server 2003 SP1, Vista, Server 2008.
- Microsoft® .NET Framework 2.0

To download and install .NET Framework 2.0, go to:

<http://www.microsoft.com/downloads/details.aspx?FamilyID=0856eacb-4362-4b0d-8edd-aab15c5e04f5&DisplayLang=en>

#### **Recommended requirements**

- 64 bit Windows operating system.
- 2 GHz CPU or faster
- 2 GB RAM or above
- Microsoft® Word Viewer 2003 (free download) to run Microsoft® Word reports.
- Microsoft® Internet Explorer 6.0 or higher to view HTML (MHT) reports
- Microsoft® MDAC 2.8 or higher (to import from an SQL database)
- An Internet connection capable of accessing XML web services (to receive automatic updates)

You need MSI 2.0 or above to install these applications. If you do not have MSI 2.0 then it will be automatically downloaded when you run the WebSpy Vantage Ultimate Setup.exe.

Regards,  
WebSpy Development Team
